Two Deals, One Strategy

EGYPT · FINTECH

E-finance bought **8% of wealthtech platform Wilzy** for c. EGP 100 mn (USD 2 mn), per Chairman **Ibrahim Sarhan** — days after confirming an outright takeover of MSME lender **Tamweely** for up to EGP 4.8 bn, buying out a consortium of international investors including **EBRD** and **British International Investment**. Tamweely priced **71% above** the EGP 2.8 bn it fetched two years ago. Wilzy is c.2% of Tamweely's size — optionality, not a balance-sheet event. Together the two deals bracket Egyptian financial services: MSME credit on one side, retail wealth on the other, on top of the payments rails E-finance already owns. Tamweely still needs shareholder, FRA and ECA approval; close expected 3Q–4Q.
